

Announcing a New Health Benefit A Concierge Prescription Drug Advocacy Service called RX Help Centers.

City of Mishawaka's current health plan, drug card and vendors will not be changing but we are offering a separate and additional service outside our current Health Plan and Rx benefit program...RX Help Centers!

What is RX Help Centers? This service has been available in the marketplace for 7 years. Consumers have found the service to be very professional, caring and helpful. This service is primarily targeted to more expensive brand name and specialty drugs, but it's very possible that the concierge service can be a help to you if those 'not so expensive drugs' in total cost you \$100 or more per month. There is no guarantee that RX Help Centers can help. But if they can...you should be able to experience significantly lower costs for your prescriptions.

This is available only to members enrolled in our Health Plan and Rx program. Members are not required to use this service, but if you are spending more than \$75 for any one prescription or \$100 or more per month for multiple prescriptions, you will want to check this out for potential cost savings to you! If you are interested in inquiring about possibly lowering drug costs for you and your family, contact the Rx Help Centers (RXHC) by clicking on this link or type it into your web browser: <http://rxc8290318-in-mishawaka.rxhelpcenters.com/>

If you decide this service will benefit you and/or your family...then we as an employer will support your decision by paying 100% of the cost of this service for you and your family as long as you are enrolled in our employee health insurance plan. This means tangibly that prescriptions obtained through this service could often be **FREE** for you and your family. Sometimes a co-pay or out-of-pocket amount will be required but this out-of-pocket may be substantially less than what you are paying now. Check it out!

You would still have the option and possibly need to obtain some drugs through the current Health Plan with the normal out of pocket for you and your family.

Please note that this is not an overnight solution and usually takes from two to four weeks on average to implement your cost savings, depending on outside circumstances of doctor cooperation, ease of communication and understanding. Be patient with this process and realize that RXHC wants to help you. The initial study is free! There is no guarantee that "RXHC" can help. But if they can...you should be able to experience significantly lower costs for your prescriptions.

Please understand that this service is not insurance. RXHC is not an insurance company and they are not offering insurance. They are a prescription drug advocacy firm helping people like you lower the cost of their prescription medications

Let's look at a family who are on an insurance plan and who were recently helped by Rx Help Centers.

We'll call the husband Jack, the wife Jill and their son Joe.

Jack, Jill and Joe's medications were reviewed with RxHC and they learned that if nothing changed (same medications) they would save.

Jack & Jill were not on expensive brand name drugs or specialty drugs.

Joe was on a very expensive brand name specialty drug that cost \$4,500 a month. Joe and his family now get the \$4,500 a month drug for **\$0**.

	Current Out of Pocket Cost	With RxHC Assistance	Savings
Jack	\$1,607	\$884	45%
Jill	\$2,424	\$1,690	30%
Joe	\$4,500	\$0	100%

If you are interested in knowing if this program can save money on prescription costs, please contact the Rx Help Centers (RXHC) by clicking on this link or type it into your web browser: <http://rxc8290318-in-mishawaka.rxhelpcenters.com/>. Please use this website to contact RX Help Centers.
