

ORGANIC EXPRESS™

**Certified Organic Produce Available
at Affordable Prices!
Order online at bborganicexpress.com**

The best organic produce value in town has already been discovered by many health-conscious Michiana consumers. They not only buy direct to save money but also enjoy the finest quality certified organic fruits and vegetables. You can take advantage of this opportunity, too!

A locally owned Mishawaka wholesale produce company, B & B Organics, has been selling certified organic fruits and vegetables to food stores, coops, and other organizations since 2001. Responding to requests from health and value-conscious individuals, B & B launched **B & B Organic Express** a year ago to make their outstanding produce available to Michiana consumers, too.

In a recent customer satisfaction survey, the B & B Organic Express program was highly rated for value, quality, and convenience. The program has been especially well received by parents with young children who understand the importance of good nutrition right from the start.

Here's how the program works:

- ❖ **New Selection Each Week** - A new list of certified organic fruits and vegetables is compiled and distributed each week. Customers can order for just one week at a time without any long-term commitments.
- ❖ **Easy Add-ons** – Favorites like apples and bananas, as well as local organic grass-fed ground beef and pasture-raised eggs, may be ordered a la carte.
- ❖ **Five convenient pick up locations throughout Mishawaka, South Bend and Granger.** (Please see the pick up location schedule for details.) You pay with cash at pick up. Organic Express boxes also can be picked up at Rose Quest Nutrition Centre (410 Lincoln Way East) in downtown Mishawaka on Wed. afternoons from 4 – 6 pm. Please request this location in the note section of the online order form.

Why Organic?

- ❖ **Protect Your Child's Health!** Since children eat more food relative to their size, and their bodies are still developing, they are more susceptible to toxic substances. Organic food is grown without harmful pesticides, hormones, antibiotics, or genetically modified organisms (GMOs) that can be harmful to health.

Customers come first at B & B Organic Express. We are committed to offering top-quality, certified organic fruits and vegetables at affordable prices and will be pleased to answer your questions. Call Susan at (574) 258-1006 and discover how easy it can be to eat healthy!
